Agricultural Development Bank

Growing stronger together

We fund Climate Smart Agriculture

If you engage in agriculture or plan to do so,

ASK .....

What Carbon Footprint am I leaving?

Now you can choose your children's legacy and at the same time help the environment heal itself. Be part of the solution not the problem and Increase your profitability.

Climate Smart Agriculture (CSA) is a series of integrated practices that reduce the impact of Climate Change. It supports Food Security and the "Triple Bottom Line" that focuses on sustainable agri-business i.e

People, Planet and Profit

What can YOU do?

Choose from these proven CSA techniques:

- Precision agriculture by applying the right inputs, at the right time, location and amounts using improved crop varieties.

ASK about Drought and Flood tolerant crops!

- Crop rotations, inter-cropping, integrated pest management (IPM). Integrated crop/ livestock management, improved grazing, manure management.

ASK about Recycling, Vermiculture and Bio-digestors!

- Improved soil and water management.

ASK about Drip Irrigation, Plastic and Organic mulches!
