

Identify a Suitable Area to Plant around the Home

So what do I do first if I want to set up a Home Garden?

There are two (2) main steps to Setting up Your Home Garden.

1. **Planning**

The Fun Part-Using a pen and paper do a simple diagram to mark where some features are on your property, e.g. +6 hrs. Sun, Shade, Wet, Dry, electricity lines, drain.

2. **Designing**

Plan the layout of the crops.

Now add to your sketch and put plants into spots that are suitable for them.
