Have your fresh produce delivered to your door!

Visit unqueue.shop or download the Unqueue app and go to the "NAMDEVCO Farmers' Market" category to order directly from our Queen's Park Savannah Farmers' Market.

1 Access to fresh, local produce

Farmers utilise sustainable techniques to ensure their produce is safe to consume. They also harvest closest to market day, which means that you'll be eating the freshest produce possible when you shop at our markets.

2 Wide Variety

Our Farmers grow an amazing variety of fruits and vegetables, including exotic fruits. When you visit our Farmers' Markets, you'll be sure to find Dragon Fruit, Rambutan, Pois Doux (Padoo) and much more. It is a wonderful opportunity to find unique commodities that are not always available at other retail outlets.

3 Protect the Environment

Many items you find at a supermarket are packaged and shipped long distances, using valuable natural resources like fossil fuels in the process. Commodities found at our Farmers' Markets are from local sources and are generally grown using methods that minimise the impact on the earth.

4 Discover Something New

There's something for everyone at our Farmers' Markets. You can shop for artisan items and agro-processed products, as well as tasty treats and popular dishes of Trinidad and Tobago. When you visit, you may even discover some new favourites that will stretch your culinary imagination.

Locally grown foods simply taste better!

5 It's Healthy

Eating fresh, local produce is great for your health. We even offer healthy wheat flour alternatives, such as, sweet potato, dasheen, cassava and breadfruit flours.

6 Safe Shopping Experience

You can enjoy your shopping experience with peace of mind knowing there is secure parking and ample security measures at our markets.

7 Support Local Farmers

When you shop at our Farmers' Markets, you are supporting the local, small Farmers and connecting with the people who grow your food.
